## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Electrohydraulic Actuator market for 2018-2023.

This report studies the Electrohydraulic Actuator for industrial market.

Electrohydraulic actuators (EHAs) eliminate the need for separate hydraulic pumps and tubing, simplifying system architectures and improving safety and reliability.

Electrohydraulic actuators incorporate servo valves and electronic controls to provide rod position feedback; thereby ensuring efficient machine operations. This amalgamation heightens accuracy, enhances functionality, improves ease-of-use, and better controls performance.

In the coming years there is an increasing demand for electrohydraulic actuator in the regions of North America and Europe that is expected to drive the market for more advanced electrohydraulic actuator. Increasing of power fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on general industry, retrofitting and renovation of old technology, increasing adoption of electrohydraulic actuator in developing countries will drive growth in global markets.

Globally, the electrohydraulic actuator industry market is low concentrated as the manufacturing technology of electrohydraulic actuator is relatively matures than some high-tech equipment. And some enterprises, like Rotork, Rexa, HOERBIGER and Emerson etc. are well-known for the wonderful performance of their electrohydraulic actuator and related services. At the same time, Europe, occupied 33.06% production market share in 2017, is remarkable in the global electrohydraulic actuator industry because of their market share and technology status of electrohydraulic actuator.

The consumption volume of electrohydraulic actuator is related to downstream

industries and global economy. As there will always be some uncertainty in the global economy in the following years, the growth rate of electrohydraulic actuator industry may not keep that fast. But it is surely forecasted that the market of electrohydraulic actuator is still promising.

Over the next five years, LPI(LP Information) projects that Electrohydraulic Actuator will register a 3.6% CAGR in terms of revenue, reach US\$ 340 million by 2023, from US\$ 270 million in 2017.
