The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Electronic Expansion Valves (EEVs) market for 2018-2023.

This report studies the Electronic Expansion Valves market. The electronic expansion valve (EEV) operates with a much more sophisticated design. EEVs control the flow of refrigerant entering a direct expansion evaporator. They do this in response to signals sent to them by an electronic controller.

Worldwide, China is the largest market of Electronic Expansion Valves, both in production and consumption market, while China is the largest contributor. It is estimated that China accounts for 64.46 % of the industry total production and consumes about 65.29 % of industry total consumption volume.

The price gap is relatively large of electronics expansion valves between different companies.

SANHUA, Fujikoki, DunAn, Saginomiya mainly supply electronics expansion valves to the home inverter air conditioner manufactures. While, Danfoss, Parker, Emerson, Castel, these player mainly supply electronics expansion valves to the commercial inverter air conditioner (power4HP) manufactures. But these companies sales volume is in small-scale sales with high price. These companies are often integrated enterprise valve manufacturer. They have advanced technology and rich production line. The generally price range is between 160\$/unit to 450 \$/unit, which does not include the price of the controller and sensors.

Over the next five years, LPI(LP Information) projects that Electronic Expansion Valves (EEVs) will register a 5.5% CAGR in terms of revenue, reach US\$ 480 million by 2023,

from US\$ 350 million in 2017.
