## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Electroplated and Resin Diamond Wire market for 2018-2023.

Diamond wire cutting (DWC) is the process of using wire of various diameters and lengths, impregnated with diamond dust of various sizes to cut through materials. Because of the hardness of diamonds, this cutting technique can cut through almost any material that is softer than the diamond abrasive.

In the world, the consumption and production areas of electroplated diamond wire are mainly in China, Japan, Europe and USA. China becomes the largest consumer in 2016, which occupied about 31% in 2016 due to the stable downstream demand. Moreover, Asahi Diamond is the largest manufacturer in the world, which production has reached 2019 K Km in 2016. The global consumption average growth has reached 34% in 2016. The Chinese demand average growth has reached 80% in 2016. Most of Chinese companies are expanding their capacities.

Over the next five years, LPI(LP Information) projects that Electroplated and Resin Diamond Wire will register a 49.0% CAGR in terms of revenue, reach US\$ 149200 million by 2023, from US\$ 13600 million in 2017.
