Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Emergency and Incident Management market for 2018-2023.

Emergency and incident management plays a vital role in securing the society. Several countries have dedicated departments that work towards implementing proper emergency and incident solutions. Many enterprises and organizations have also started implementing emergency response solutions in their premises in order to mitigate the risks.
Increasing incidents pf terrorist and biohazardous attacks, and unpredictable natural disasters due to ever changing climatic conditions, and stringent government regulations and norms are expected to drive the market.
The telecom and IT industry vertical is expected to be fastest growing, as it is considered as an important element in the economic and social growth of a country. The loss of data and valuable information can severely hamper the operations of the telecom companies. Thus, there is a huge need to protect such data and information.
United States is expected to have the largest market share and dominate the incident and emergency management market from 2018 to 2023, due to the presence of major incident and emergency management solution vendors and Managed Security Service Providers (MSSPs).
Over the next five years, LPI(LP Information) projects that Emergency and Incident Management will register a xx% CAGR in terms of revenue, reach US$ xx million by 2023, from US$ xx million in 2017.
