Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Employee Scheduling Software market for 2018-2023.

This report studies the Employee Scheduling Software market. Employee scheduling software automates the process of creating and maintaining a schedule. Automating the scheduling of employees increases productivity and makes many secretarial and manual scheduling positions obsolete. Such software will usually track vacation time, sick time, compensation time, and alert when there are conflicts. As scheduling data is accumulated over time, it may be extracted for payroll or to analyze past activity. Although employee scheduling software may or may not make optimization decisions, it does manage and coordinate the tasks. Today's employee scheduling software often includes mobile applications. Mobile scheduling further increased scheduling productivity and eliminated inefficient scheduling steps.
Employee Scheduling Software is mainly used for the following applications: Small Business, Midsize Enterprise, Large Enterprise, Others. And Small Business is the most widely used type which takes up about 53.19% of the global total in 2017.
The global Employee Scheduling Software average price is influenced by the global trend. Complete software is usually 0 USD/month to 150 USD/month from abroad vendors, if you want to buy new Employee Scheduling Software. The average price will be in decline trend if more vendors go into operation in the future. The Employee Scheduling Software sales will reach about 530.87 Million USD in 2023 from 251.18 Million USD in 2017 all around the world, with the CAGR of 13.28%.
USA is one of the largest consumption countries of Employee Scheduling Software in

the world in the past few years and it will keep increasing in the next few years. USA market took up about 42.35% the global market in 2017, while Europe was 30.25%, and Japan is followed with the share about 3.52%.
Over the next five years, LPI(LP Information) projects that Employee Scheduling Software will register a 13.4% CAGR in terms of revenue, reach US$ 530 million by 2023, from US$ 250 million in 2017.

This report presents a comprehensive overview, market shares and growth opportunities of Employee Scheduling Software market by product type, application, key companies and key regions.

To calculate the market size, LP Information considers value generated from the sales of the following segments:

Segmentation by product type:

Cloud-based

Mobile APP

Other

Segmentation by application:

Small Business

Midsize Enterprise

Large Enterprise

Other

We can also provide the customized separate regional or country-level reports, for the following regions:
