An evaporative air Coolers (also swamp cooler, desert cooler and wet air cooler) is a device that cools air through the evaporation of water, which can cool air using much less energy than refrigeration. Evaporative cooling differs from typical air conditioning systems which use vapor-compression or absorption refrigeration cycles. In extremely dry climates, evaporative cooling of air has the added benefit of conditioning the air with more moisture for the comfort of building occupants.

The Evaporative Air Coolers industry concentration is scattered; there are over 20 mainly manufacturers in the world, and the products mainly from EU, USA and China. Global giant manufactures mainly distributed in EU and USA. However, manufacturers from USA have a long history and unshakable status in this field. Manufacturers such as BAC and Evapco have relative higher level of product's quality.
