In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Extenders market for 2018-2023.

A wireless network uses radio waves to communicate with portable devices, granting them access to other connected devices and to the Internet. Many factors can affect the strength of these radio waves, and you may find dead spots in your office network where you cannot connect.

WiFi extenders are devices to improve WiFi coverage. It works by receiving your existing WiFi signal, amplifying it and then transmitting the boosted signal. With a WiFi repeater you can effectively double the coverage area of your WiFi network - reaching far corners of your home or office, different floors, or even extend coverage to your yard. Using Wi-Fi extenders, you can bridge these dead spots and provide a solid signal throughout your facility.

As for regions in 2015, China area is the biggest consumption area, accounting for 25.61% of the total consumption.
Over the next five years, LPI(LP Information) projects that Extenders will register a xx% CAGR in terms of revenue, reach US$ xx million by 2023, from US$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Extenders market by product type, application, key manufacturers and key regions.
