In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Extra High Voltage Cables market for 2018-2023.

An extra high-voltage cable (EHV cable) is a cable used for electric power transmission at extra high voltage. A cable includes a conductor and insulation. The extra high voltage is between 230KV to 1000KV.

In the coming years there is an increasing demand for extra high voltage cables in the regions of Europe and USA that is expected to drive the market for more advanced extra high voltage cables. Increasing of electricity industry fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on infrastructure, retrofitting and renovation of old technology, increasing adoption of extra high voltage cables in APAC will drive growth in global market.

Globally, the extra high voltage cables industry market is low concentrated as the manufacturing technology of extra high voltage cables is relatively matures than some high-tech equipment. And some enterprises, like Nexans, General Cable, SEI and Southwire, etc. are well-known for the wonderful performance of their extra high voltage cables and related services. At the same time, Europe, occupied 28.44% production market share in 2017, is remarkable in the global extra high voltage cables industry. The consumption volume of extra high voltage cables is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of extra high voltage cables industry may not keep that fast. But it is surely forecasted that the market of extra high voltage cables is still promising.

With emerging economies growing faster, a strategy has been adopted by most leading vendors in the extra high voltage cables market to approach these areas. QYR analysis of the extra high voltage cables market indicated that Europe would account for the highest sales in 2023 with close to 27.12 percent of global sales coming from this region, and Asia has the highest growth rate. Vendors recognize the importance of this region, particularly in China, and are working towards penetrating this market by strengthening their sales and distribution networks.

Over the next five years, LPI(LP Information) projects that Extra High Voltage Cables will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
