Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Eyeliner market for 2018-2023.

Eyeliner is a cosmetic used to define the eyes. It is applied around the contours of the eye(s) to create a variety of aesthetic effects. The makeup is usually used by women and girls, sometimes for males for purpose like fashion.

Eyeliner is commonly used as a daily make up routine to define the eye or create the look of a wider or smaller eye. Eyeliner can be used as a tool to create various looks as well as highlighting different features of the eyes.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, there will be many uncertainties for eyeliner industry in the next few years. But in a global view, Chinese consumption of cosmetics is increasing fast. The competition between manufacturers at home and abroad is fierce for the time being. The Eyeliner technology in China is relatively backward with few leading manufacturers.

Eyeliner demand has a certain space. In developed countries, there is little space to improve the sales. But in China, there is still much space. As the GDP increasing in China, Chinese market will be improved as well.

As large demand of high-end products at home and abroad, many companies try to provide high-end products with larger capacity to meet consumers' demand and to account for larger market share.

Over the next five years, LPI(LP Information) projects that Eyeliner will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Eyeliner market by product type, application, key manufacturers and key regions.
