In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Fatty Acids, Vegetable-oil, Me Esters, Sulfurized market for 2018-2023.

Fatty acids are important component of lipids (fat-soluble components of living cells) in plants, animals, and microorganisms. Generally, a fatty acid consists of a straight chain of an even number of carbon atoms, with hydrogen atoms along the length of the chain and at one end of the chain and a carboxyl group ( $\text{COOH}$ ) at the other end. It is this carboxyl group that makes it an acid (carboxylic acid). If the carbon-to-carbon bonds are all single, the acid is saturated; if any of the bonds is double or triple, the acid is unsaturated and is more reactive. A few fatty acids have branched chains; others contain ring structures (e.g., prostaglandins). Fatty acids are not found in a free state in nature; commonly they exist in combination with the alcohol glycerol in the form of triglyceride.

From the point of upstream supply to analysis, the manufacturer in Asia has the absolute advantage, one of the raw materials palm and other oilseed, more than 85% of global palm oil production concentrated in southeast of Asia, and with low prices in Chinese region. Therefore, manufacturers in the region will be take lower raw material costs.

Market competition is intense. Like ADM Cargill Bunge, LouisDreyfus and Wilmar etc. are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry. Despite the competition problem still exists, due to the trend of global economic recovery, it is clear that investors are still optimistic about this area, there will still be more new investors in the future to enter the field.

Over the next five years, LPI(LP Information) projects that Fatty Acids, Vegetable-oil, Me Esters, Sulfurized will register a 2.2% CAGR in terms of revenue, reach US\$ 227500 million by 2023, from US\$ 200200 million in 2017.
