In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Feeler Gauge market for 2018-2023.

Feeler Gauge is a thin metal strip of known thickness used to measure the gap widths. Mainly these gauges are used in the field of engineering. In engineering it is used to measure the gap present in between them.

As for the global feeler gauge industry, the industry structure is relatively stable. The top three manufacturers have one third revenue market share in 2015. The United States giant Stanley Black & Decker, which has 12.16% market share in 2015, is the leader in the feeler gauge industry. The manufacturers following Stanley Black & Decker are TTI and SnapOn, which respectively has 10.00% and 9.53% market share globally. The Great Star is the leader of China mainland feeler gauge industry. It sells a total of 1.88 million dollar feeler gauge products in the year of 2015.

The downstream industries of feeler gauge products are engineering and construction. In the recent years, with the recovery of global economic, the development of emerging countries and the spurring spending of automotive, the consumption increase of feeler gauge will be obvious. In the foreseeable future, the feeler gauge products will show an optimistic upward trend.

Although sales of feeler gauge products bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the feeler gauge

field hastily.

Over the next five years, LPI(LP Information) projects that Feeler Gauge will register a 1.2% CAGR in terms of revenue, reach US\$ 110 million by 2023, from US\$ 100 million in 2017.
