In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global FerroSilicon market for 2018-2023.

FerroSilicon is basically a ferroalloy, alloy of silica and iron which contains about 15% to 90% of silicon.

Rising demand for ferrosilicon as a deoxidizer and inoculant across the various end-use industry is expected to have significant impact on the market growth over the near future.

Asia Pacific is expected to dominate the global FerroSilicon market both in terms of value and volume. China is the major consumer as well as producer of the ferrosilicon around the globe.

The demand growth of the ferrosilicon in the country is expected to decline over the next decade owing to the illegal exports of the material in the South Korea and Japan, and also changes in the governmental policies have significantly impacted the market in the country.

Over the next five years, LPI(LP Information) projects that FerroSilicon will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of FerroSilicon market by product type, application, key manufacturers and key regions.
