## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Fiber Optic Cables (Fiber-optic Cable) market for 2018-2023.

Fiber optic cable is a cable containing one or more optical fibers that are used to carry light. The optical fiber elements are typically individually coated with plastic layers and contained in a protective tube suitable for the environment where the cable will be deployed.

In the last Five years, along with the quick development with mobile upgrade programs and FTTH programs, global Fiber Optic Cables market is growing quite fast, with a CAGR at 11.45% from 2013 to 2018 in terms of volume from 328 million Fiber-Km to 564 million Fiber-Km.

Asia-Pacific is the largest consumption area of Fiber Optic Cables industry, over 70% of Fiber Optic Cables are consumed in this region. Factors in near-term demand include continuation of the FTTH construction effort and 5G deployment. Although the FTTH projects of China Telecom and China Unicom already have passed a large percentage of the homes in China's major cities, the government's requirement to improve broadband coverage in rural areas, as well as the 5G network construction in the next few years, may be a factor keeping demand for optical cable at high levels after 2017. Besides Asia-Pacific, North America is the second largest consumption market, followed by Europe.

Compared to the concentrated optical fiber perform industry, the concentration of Fiber Optic Cables industry is low. Leading manufacturers are Prysmian, HTGD, Furukawa, Corning, YOFC, etc. Concentration rate of top 6 is 39.48% % in 2018, compare to 37.94% in 2013.

In general, bulk purchase is the majority market status. Though the giants have occupied considerable market share, there are still a large quantity of manufacturers of Fiber Optic Cables with small capacity around the world.

Although sales of Fiber Optic Cables brought a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and downstream support do not to enter into the Fiber Optic Cables field.

Over the next five years, LPI(LP Information) projects that Fiber Optic Cables (Fiber-optic Cable) will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
