Fingerprint biometrics machine is a security identification and authentication device through fingerprint recognition. In this report, fingerprint biometrics machines include single finger and multi-finger, in applications such as government, banking and finance, travel and migration, criminal and others.

As for the global fingerprint biometrics machine industry, the industry structure is relatively dispensable. The top three manufacturers have 16.30% revenue market share in 2015. The France giant Safran, which has 7.32% market share in 2015, is the leader in the fingerprint biometrics machine industry. The manufacturers following Safran are 3M Cogent and Crossmatch, which respectively has 4.91% and 4.07% market share globally. The ZKTeco is the leader of China fingerprint biometrics machine industry. It sells a total of 3.58 million dollar fingerprint biometrics machine products in the year of 2015.

The downstream industries of fingerprint biometrics machine products are government, banking and finance, travel, migration and criminal. In the recent years, with the rising awareness of security, the enlargement of commercial spending and unsolved high rate of criminal, the consumption increase of fingerprint biometrics machine will be obvious. There is a huge potential need for the fingerprint biometrics machine. In the foreseeable future, the fingerprint biometrics machine products will show an optimistic upward trend. Although sales of fingerprint biometrics machine products bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter

into the fingerprint biometrics machine field hastily.

Over the next five years, LPI(LP Information) projects that Fingerprint Biometrics Machine will register a 4.0% CAGR in terms of revenue, reach US\$ 1450 million by 2023, from US\$ 1150 million in 2017.
