Flat Glass Coatings enhance the accurateness of solar panels. This promising technology will drive the water and the flat glass coatings reduce the sun reflection which marks into more power generation. Many glass products aren't useful if they are uncoated. By flat glass coatings, it improves functionality. The flat glass coatings convert glass surfaces into oil resistant, heat & water resistant, an anti-fingerprint surface that is impermeable to dirt, dust, oils, and other particulates. As compared to untreated glass, the coated glass surface is easy to clean and remains clean for a longer period.

North America is dominant in the flat glass coatings market followed by the Asia Pacific and Europe, during the forecast period.

Over the next five years, LPI(LP Information) projects that Flat Glass Coatings will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
