In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Flomoxef Sodium market for 2018-2023.

Flomoxef sodium is an oxacephem antibiotic usually grouped with the cephalosporins. In oxacephems, the sulfur atom of the cephalosporin core is replaced with an oxygen atom.

Flomoxef sodium is a kind of APIs and useful for curing staphylococcus aureus infections. Due to high technology barrier, there are few companies able to produce the product and Shionogi highly monopolizes the market at the moment.

Although few companies have achieved commercial production of flomoxef sodium at this moment, they continue to invest on technology research. According to our research, a Chinese based company has plans to sell their flomoxef sodium in early 2017.

Due to immature technology, flomoxef sodium production capacity will not be released quickly in the recent years. However, once some company overcomes technology bottleneck and produces flomoxef sodium, the company can achieve preferable gains, that's why many investors are trying hard to enter into the industry currently.

Over the next five years, LPI(LP Information) projects that Flomoxef Sodium will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
