In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Fluororubber market for 2018-2023. Fluororubber (fluoroelastomer) is a kind of synthetic polymer elastomer with fluorine atom attached to main chain or side chain's carbon atom.

The fluororubber industry is relatively concentrated. As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties. Ordinary fluororubber products on the market do not sell well, and fluororubber's price is lower than past years. The signal of market price change indicates the trend in the fluororubber industry, and low-end product has excess capacity while high-end product is in short supply.

The global production of FKM increases from 21050 MT in 2010 to 26909 MT in 2015, with an average growth rate of more than 5.04%. While the growth rate of FSR is higher than FKM. The production of FFKM fell in 2012 owing to the economic crisis. For FKM and FFKM, Dupont is the world leader, which holds 21.46% and 53.77% production market share respectively in 2015. For FSR, Dow Corning is the world leader and Dupont is the second biggest manufacturer.

Over the next five years, LPI(LP Information) projects that Fluororubber will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
