In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Frozen Fruit market for 2018-2023.

Frozen fruits can retain their quality over long storage periods.

Freezing is a method of long-term preservation for fruits. The main advantage of preservation by freezing is the extended availability of frozen fruits during the off-season. Additionally, frozen fruits can be transported to remote markets that could not be accessed with fresh products.

Compared with ordinary fruit, frozen fruits retain the majority of their nutrients after the freezing process, although fruits may experience a loss of vitamin C. As the same time, fruits that manufacturers select to freeze are ripe and ready to eat, which are in the state of the highest nutritional value.

Frozen fruits can be used in food processing industries, such as cake, bread. Frozen fruits are also sold as the end products in supermarkets, fruit store, etc.

The technical barriers of frozen fruit are not high, and the frozen fruit enterprise concentrate in China, USA, Poland, Hungary, etc. and the relative large companies include Ardo, Dole, Crop's nv, MIRELITE MIRSA, Simplot, Pinnacle Foods, Wawona Frozen Foods, SunOpta and others.

The customers of frozen fruit include retailers of fruit, food manufacturers, ready meal producers, pizza manufacturers, foodservice, farm shops, wholesalers, sandwich makers, bread makers and many more. With higher spending propensity and a rising demand for healthy convenience foods, the demand for frozen fruit is expected to continue increasing during the remaining years of the forecast period of 2016-2021.

Frozen fruit industry will usher in a stable growth space.

Over the next five years, LPI(LP Information) projects that Frozen Fruit will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
