In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Fullerene market for 2018-2023.

A fullerene is a molecule of carbon in the form of a hollow sphere, ellipsoid, tube, and many other shapes. Spherical fullerenes, also referred to as Buckminsterfullerenes (buckyballs), resemble the balls used in football (soccer). Cylindrical fullerenes are also called carbon nanotubes (buckytubes). Fullerenes are similar in structure to graphite, which is composed of stacked graphene sheets of linked hexagonal rings; unless they are cylindrical, they must also contain pentagonal (or sometimes heptagonal) rings. It can be used in Industrial Materials, Catalyst Field and so on.

Over the next five years, LPI(LP Information) projects that Fullerene will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Fullerene market by product type, application, key manufacturers and key regions.
