Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Garbage Truck market for 2018-2023.

Garbage truck or dustbin lorry refers to a truck specially designed to collect small quantities of waste and haul the collected waste to a solid waste treatment facility. Other common names for this type of truck include trash truck and dump truck in the United States, and rubbish truck, bin wagon, dustcart, dustbin lorry, bin lorry and bin motor elsewhere. Technical names include waste collection vehicle and refuse collection vehicle. These trucks are a common sight in most urban areas.

Environmental regulations have become quite stringent owing to the increasing pollution levels globally. Automobile manufacturers have a tough time meeting these regulations. Diesel based garbage collection trucks are also known to be fuel inefficient, which is why the adoption of alternatives such as CNG-based and electric vehicles is quite high in the region. This factor is expected to support the future growth of garbage collection trucks in Europe. Apart from having a large industrial base, the residential segment has also been witnessing stable growth. Waste generation per capita is also expected to surge, which is anticipated to augment the growth of garbage collection trucks in Europe over the forecast period.

Over the next five years, LPI(LP Information) projects that Garbage Truck will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
