In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Gas Spring market for 2018-2023.

A gas spring is a type of spring that, unlike a typical metal spring, uses a compressed gas, contained in a cylinder and compressed by a piston, to exert a force.

Asia-Pacific occupied 37.2% of the sales market in 2016. It is followed by Europe and North America, which respectively have around 26.09% and 24.94% of the global total industry. Other countries have a small amount of production.

Gas spring is mainly in the field such as automotive, furniture and industrial, which respectively have around 30.52%, 25.33% and 15.98% of the global total industry.

For industry structure analysis, the Gas spring machine industry is not 52concentration. Stabilus is the market leader and occupied about 28.76% of the whole market in 2016.

For forecast, the global gas spring machine revenue would keep increasing with annual growth rate with 2~6%. We tend to believe that this industry still has a bright future, considering the current demand of gas spring machine. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.

Over the next five years, LPI(LP Information) projects that Gas Spring will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
