In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Glassfibre Reinforced Concrete market for 2018-2023.

Glassfibre Reinforced Concrete (GRC) is a type of fiber-reinforced concrete. Glass fiber concretes are mainly used in exterior building façade panels and as architectural precast concrete. Somewhat similar materials are fiber cement siding and cement boards. Glassfibre Reinforced Concrete consists of high-strength, alkali-resistant glass fiber embedded in a concrete matrix.

The commercial construction application is projected to lead the GRC market during the forecast period, in terms of value and volume. The growth of the commercial construction application can be attributed to the increasing use of GRC in buildings, such as offices, institutes, hospitals, gymnasiums, cinema theatres, museums, and auditoriums.

Over the next five years, LPI(LP Information) projects that Glassfibre Reinforced Concrete will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
