In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Graphite and Carbon Sealing Gasket market for 2018-2023.

Graphite and Carbon Sealing Gasket is the most resistant gaskets for flanges capable to withstanding to high temperature and pressure. Standard Gaskets are 95% to 98% pure, with a nuclear grade available at 99.9% purity.

Graphite gaskets are cut from pure graphite sheet or graphite sheet with metal reinforcement, features excellent corrosion-resistance, high-and-low temperature resistance, good compression resilient and high intensity it can be used as sealing elements of pipe, valve, pump, pressure vessel, heat exchanger and condenser, etc. As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties, and coupled with Graphite and Carbon Sealing Gasket industry in short supply on the market in the past few years, more and more companies enter into Graphite and Carbon Sealing Gasket industry. Ordinary Graphite and Carbon Sealing Gasket products on the market do not sell well; the Graphite and Carbon Sealing Gasket' price is lower than past years. The signal of market price change indicates the trend in the Graphite and Carbon Sealing Gasket industry.

Graphite and Carbon Sealing Gasket product demand market there is also a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a large market demand for high-end products to seize market share of imports acts, local enterprises export more low-end products overcapacity or molding process basic Materials.

Despite the presence of competition problems, due to the global recovery trend is clear,

investors are still optimistic about this area; the future will still have more new investment enter the field.

Over the next five years, LPI(LP Information) projects that Graphite and Carbon Sealing Gasket will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
