Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Greeting Cards market for 2018-2023.

Greeting cards are pieces of paper or cardboard upon which photos, drawings, and a verse of cheer, greeting, celebration, condolence, etc. have been printed or engraved. Greeting cards are decorated with a variety of images and include messages to appeal to diverse audiences, sentiment, and occasion to be remembered. Greeting cards are low cost impulse purchase products that are being purchased on a daily basis. Around the world, greeting cards are used to celebrate everything from birthdays to Valentine's Day. Greeting cards keep people personally connected.

The USA will lead the global market for Greeting Cards during the forecast period. This region accounts for the largest global market share and is followed by the UK. There is an ingrained culture of sending greeting cards in the UK, with estimates suggesting an average of approximately 24 cards sent per person each year, of which on average 17 are single greeting cards. Card purchasing is occasion-driven, focused around key events (e.g. birthdays, anniversaries and seasons such as Christmas). A person's age and stage of life are major drivers of their propensity to purchase greeting cards, with purchasing levels significantly higher in older consumers and those with families. The evidence suggests that card purchasing behavior is broadly stable across generations but with an increase in the number of cards purchased by 18 to 34 year olds. This, when combined with both a growing and ageing UK population, is an encouraging indication of the ongoing sustainability of the card market in the UK and is something we will continue to monitor. However, considering the changes in the exchange rate of the British pound and the US dollar, the UK market experienced a slight decline in 2017.

Of the major players of the Greeting Cards market, Hallmark Cards maintained its first place in the ranking in 2017. Hallmark Cards accounted for 29.247% of the Global Greeting Cards market share in 2017. Other players accounted for 22.368%, 5.144% including American Greetings and Card Factory.

Over the next five years, LPI(LP Information) projects that Greeting Cards will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
