In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Guerbet Alcohols market for 2018-2023. Guerbet Alcohols is the Alcohols made by Guerbet reaction. The Guerbet reaction, named after Marcel Guerbet (1861–1938), is an organic reaction converting a primary aliphatic alcohol into its β -alkylated dimer alcohol with loss of one equivalent of water. This reaction requires a catalyst and elevated temperatures. Guerbet alcohols are branched saturated alcohols with superior oxidative stability and extremely low volatility. Growing need for perfuming agents, emulsion stabilizer and super fattening agent in the range of cosmetic ingredients have revved up demand for guerbet alcohols. Attributed to low irritation and volatility characteristics, guerbet alcohols will witness significant demand in various industrial applications. The market is driven by various end-user industries, such as cosmetics & personal care, metal processing, detergents and cleaners, etc.

The market expansion of the global guerbet alcohols market is somewhat walled by high prices. Guerbet alcohols are highly priced and most of the manufacturers are based across Europe and North America.

The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Market stays in mature period with a clear concentration. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins. Manufacturers can take advantage of this situation by reinforcing their production units and supply-chains to avoid any delay in production turn-around-times (TAT) and supply-lead-times.

Over the next five years, LPI(LP Information) projects that Guerbet Alcohols will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
