In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global High Class KVM Switches market for 2018-2023.
KVM switches are hardware devices that allow IT personnel to use a single keyboard, video monitor, and mouse (KVM) to control more than one computer at a time.
High class KVM switches with multiple ports can be installed in a server rack using only 1U or 2U in space, and help organization improve efficiency and reduce cost by centralizing computing resources in server rooms, enabling users to share expensive resources and providing users with a more effective work environment. High class KVM switches possess high density, high resolutions, high ports numbers and multi users on operation at the same time, and widely applied in large networks.
The high class KVM switches market was monopolized by foreign large companies, such as Emerson, Raritan, Aten, Belkin, etc. Emerson has acquired a large supplier, Avocent, in 2009, and then Emerson became the largest manufacturer in the world. In 2015, Emerson holds over 40 percent in high class KVM switches market. It is hard for Raritan to shake the place of Emerson and rank second. Aten is major in low and middle class KVM market due to high technology level, and Aten is increasing the research investment of high class products. The first three companies holds about a market share of 70 percent.
In 2015, major demand is expected to account 36.36% from North America in the global high class KVM switches market. China is occupied 22.34% market in high class KVM switches industry and will increase stably. Other major demand is expected from emerging markets of Europe contributed 16.04 percent.
