Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global High Intensity Magnetic Separator market for 2018-2023.

High intensity separators are used for cleaning of material from impurities as well as for concentration and accumulation processes for minerals. They are best used to separate fine particles which have poor magnetic properties. The utilization of extremely powerful permanentmagnetic material guarantees superior separation results.

First, for industry structure analysis, the High Intensity Magnetic Separator industry is relatively unconcentrated. These manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top 3 players are Mineral Technologies, SLon Magnetic Separator Ltd and Metso, which accounts for 13.6% revenue of the global market.

Second, the sales of High Intensity Magnetic Separator increased from 4145 Units in 2013 to 5297 Units in 2017 with an average growth rate of more than 6.32%.

Third, Europe occupied 21.24% of the consumption volume market in 2017. It is followed by North America which have around 16.84% of the global total industry.

Geographically, Asia-Pacific was the largest consumption market, which took about 32.36% of the global consumption volume in 2017.

Fourth, for price trend analysis, a key variable in the performance of High Intensity Magnetic Separator producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Fifth, for forecast, the global High Intensity Magnetic Separator revenue would keep increasing with CAGR of 4.44%. We tend to believe that this industry still has a bright

future, considering the current demand of High Intensity Magnetic Separator. Over the next five years, LPI(LP Information) projects that High Intensity Magnetic Separator will register a 4.5% CAGR in terms of revenue, reach US\$ 280 million by 2023, from US\$ 210 million in 2017.
