In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global High Voltage Equipment market for 2018-2023.

High voltage equipment becomes the integral part of the transmission and distribution network. Power transmission includes equipment such as transformers and reactive compensation, breaker, protection and control and communication equipment and others. Continuously growing energy demand will continue to be the central market driver for transmission equipment.

Continuous demand for electricity in highly populated countries such as India and China has improved the development of power T&D equipment. The length of the installed T&D lines over the next five years is likely to be the highest in Asia-Pacific among all regions. Moreover, the T&D expenditure in Asia-Pacific is also the highest. High voltage equipment is extensively used by utilities companies. North America and Europe currently have market for grid modernization and replacement of old installations. Along with the capacity enhancement trending world-wide, the investments in the offshore wind farms are expected to drive the market

Over the next five years, LPI(LP Information) projects that High Voltage Equipment will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
