High Voltage Power Cables is a cable used for electric power transmission at high voltage. High-voltage cables of differing types have a variety of applications in instruments, ignition systems, and AC and DC power transmission. Most high-voltage cables for power transmission that are currently sold on the market are insulated by a sheath of cross-linked polyethylene (XLPE). Some cables may have a lead or aluminium jacket in conjunction with XLPE insulation to allow for fiber optics.

The high voltage power cables industry has a rapid development in the past years. And recently, for the fast development of renewable energy, high voltage power cables manufacturers have expanded capacity and production. Global production of high voltage power cables is from about 29458.18 Km in 2011 to 40492.20 Km in 2016. For the manufacturers, Prysmian is the leader in the industry. While Japan, China, Europe companies also have worldwide business and expanded capacity.
