Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Home Security market for 2018-2023. Home security system is a set of integrated systems connects to your home Wi-Fi network so you can monitor and control your security devices using your smartphone and an app. Entry-level systems typically include a couple of door and window sensors, a motion detector, and a hub that communicates with these devices using one or more wireless protocols such as Wi-Fi, Z-Wave, ZigBee, or a proprietary mesh network. You can add extra door, motion, and window sensors to provide coverage for your entire house and build a comprehensive system that includes door locks, garage door openers, indoor and outdoor surveillance cameras, lights, sirens, smoke/CO detectors, water sensors, and more. The key part of connected home security system is smart Hub or smart control panel. The hub connects to your router via a wired ethernet connection and infiltrates your airwaves with a signal that the smart home devices respond to. The future of the home security market looks attractive with opportunities in the residential sector. The major growth drivers for this market are increasing rate of crime, declining prices of security products, increasing awareness related to safety and security, and the growing adaption of cloud-based technologies. Emerging trends, which have a direct impact on the dynamics of the home security industry, include adoption of artificial intelligence and machine learning software in the residential security sector and constant developments of security technologies, such as smart cameras and sensors.

Over the next five years, LPI(LP Information) projects that Home Security will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in

2017.
