The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Hydraulic Accumulator market for 2018-2023.

Hydraulic accumulator is an important energy storage apparatus in hydraulic systems. A hydraulic accumulator enables a hydraulic system to cope with extremes of demand using a less powerful pump. With the help of hydraulic accumulator, hydraulic system and machines can respond more quickly to a temporary demand. Hydraulic accumulator is widely used in general hydraulic systems, engineering machinery and machine tools etc.

Though international economic situation is complicated, economy of China is developing rapidly from 2011 to 2015. Demand of global and China hydraulic accumulator will maintain steady growth, but with a decreasing speed. Global consumption volume is mainly focused on the area of China with the share of 31% (2015). China is the largest consumption country of hydraulic accumulator; the following regions include USA, Europe and Japan. As hydraulic accumulator is widely used in many industrials, fast development of downstream, such as new energy automobile and wind power industry, will strongly promote the demand of hydraulic accumulator.

Raw material and the manufacturing technologies deeply affect the hydraulic accumulator production. According to our long-term observation and research, the price of the hydraulic accumulator declined in the past five years, and the price will remain slightly dropped in the following five years. As a result, gross margin is expected to drop more in the next three years.

The hydraulic accumulator industry has great development prospects and will keep a steady growth rate in the following few years. We are still optimistic about the hydraulic

accumulator market in the next 5 years. And it is predicted that the global hydraulic accumulator market will remain growth rate of more than 3.0%. The data will be 5.0% for China hydraulic accumulator market.

Over the next five years, LPI(LP Information) projects that Hydraulic Accumulator will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
