Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Hydrochloric Acid market for 2018-2023. Hydrochloric acid was historically called acidum salis, muriatic acid, and spirits of salt and is a clear, colorless, highly pungent solution of hydrogen chloride (HCl) in water. It is a highly corrosive, strong mineral acid with many industrial uses.

Hydrochloric acid consumption in Europe is relatively stable development in recent years with a relatively stable state. However, Prices fell sharply, resulting in a sharp decline in sales value.

The future trend of hydrochloric acid mainly depends on the operating rate of the chlor alkali industry, but synthetic hydrochloric acid is a new direction of development in the future.

At present, it has a certain scale, but because of the high price and cost, which limits his development. The research group is optimistic about this industry.

Over the next five years, LPI(LP Information) projects that Hydrochloric Acid will register a 1.7% CAGR in terms of revenue, reach US\$ 8300 million by 2023, from US\$ 7490 million in 2017.
