In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Industrial Temperature Controllers market for 2018-2023.

Industrial temperature controller is an on-off type controller which senses the temperature of the system, compares it with a user-fed threshold temperature value and switches the heater on or off accordingly.

Industrial temperature controllers are classified as single loop/multiloop temperature controllers (take revenue market share 61.09%), hybrid temperature controllers (take revenue market share 26.11 %), and analog temperature controllers (take revenue market share 12.80 %).

One driver in market is communication capability in temperature controllers. One of the main reasons for the decline of analog temperature controllers and an increase in the demand of hybrid controllers is the communication capability of these models.

Temperature controllers have undergone a number of technological advancements, such as the reduction in size and enhanced communication capability.

Key vendors are Omron, ABB, Eurotherm, Honeywell, WEST, GEFTRAN, Watlow, Durex Industries, Jumo, CD AUTOMATION, ASCON, PIXSYS and etc. and the top five players cover over 50% revenue market share.

Over the next five years, LPI(LP Information) projects that Industrial Temperature Controllers will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
