Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global IQF Cheese market for 2018-2023.

IQF technology comes with the best solution for this market, with IQF Cheese opening up a large market share for fine cheeses and delicate cheese products. Consumers all over the world are able to buy and consume cheese products that were very exclusive, with the help of IQF technology. Also, IQF Cheese is a new and high quality frozen product that fits very well in the existing frozen product range for ready meals and ready-to-go products such as IQF vegetables, IQF fruits, IQF meat and IQF seafood. IQF Cheese is used for pizza, pasta, salads, antipasti, sandwiches, soups and bakery. There has been a constant growth in the cheese industry over the last 10 years, fueled by the increasing demand for ready to eat meals, healthy snacks, organic cheese as well as higher demands from frozen pizza producers.

Future growth in the cheese industry is driven by the increasing demand from the frozen pizza producers. As the IQF Cheese has the advantage of being easy to use and spread by the processors, it is gaining increasing popularity on the market of frozen dairies.

Today's consumers ask for convenience, thus manufacturers offer products and packaging solutions that are portable and easy to use. Many manufacturers are trying to make capital on snacking and ready-to-go cheese products as this trend is growing.

Manufacturers of IQF Cheese shred high quality cheese at its peak performance age,

and then freeze each piece individually. This process locks in the freshness and stops the aging process, providing foodservice and industrial users with a consistent, high-quality product. IQF Cheeses are well-suited for pizza toppings and unique cheese blends. Foodservice operators simply scoop the free-flowing cheese directly from the box as needed. Innovations such as these enable suppliers to develop new products to meet the latest consumer trends – or start new trends – keeping customers ahead of the competition.

Over the next five years, LPI(LP Information) projects that IQF Cheese will register a 4.6% CAGR in terms of revenue, reach US\$ 950 million by 2023, from US\$ 730 million in 2017.
