In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Jaw Crushers market for 2018-2023.

A Jaw Crusher is one of the main types of primary crushers in an ore processing or a mining plant. A Jaw Crusher lessens large size rocks or ore by having placed the rock into compression. A fixed jaw, mounted in a "V" alignment is the stationary breaking surface, whereas the mobile jaw exerts force on the rock by forcing it against the stationary plate. The space at the bottom of the "V" aligned jaw plates is the crusher product size gap, or the size of the crushed product from the jaw crusher. The rock stays in the jaws till it is small enough for passing through the gap at the jaws' bottom. In the coming years there is an increasing demand for Jaw Crushers in the regions of China that is expected to drive the market for more advanced Jaw Crushers. Growth in government budgets in the principal countries, recovery of mining fields, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of Jaw Crushers will drive growth in North America and Europe markets.

Globally, the Jaw Crushers industry market is low concentrated as the manufacturing technology of Jaw Crushers is relatively matures than some high-tech equipment. And some enterprises, like Metso, Sandvik, Terex, etc. are well-known for the wonderful performance of their Jaw Crushers and related services. At the same time, China, occupied 35.16% production market share in 2017, is remarkable in the global Jaw Crushers industry because of the lowest cost of labor and raw material.

The consumption volume of Jaw Crushers is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the

following years, the growth rate of Jaw Crushers industry may not keep that fast. But it is surely forecasted that the market of Jaw Crushers is still promising. Over the next five years, LPI(LP Information) projects that Jaw Crushers will register a 4.1% CAGR in terms of revenue, reach US\$ 2110 million by 2023, from US\$ 1660 million in 2017.
