## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Jellies and Gummies market for 2018-2023.

Jellies and Gummies are candies that have a hard sugar shell with a soft center. There is a clear distinction between a gummy and jelly candy. Gummy candy, as the name suggests, has a gummy texture. Not quite like chewing rubber bands or calamari, but certainly more elastic than any other soft candy. Since gelatin is the only material that gives that texture, by definition, gummies are made with gelatin.

Jelly candies are solidified using carbohydrates, not proteins. So, a jelly bean center is usually made with corn starch. Other jelling ingredients are pectin, tapioca, and potato or arrowroot starch.

The companies are caring more about their marketing channel, such as using both online and offline channel to prompt their products. What's more, they are building the steady relationship with the distributors and meanwhile, searching for new channels, especially to the emerging market.

Over the next five years, LPI(LP Information) projects that Jellies and Gummies will register a 3.7% CAGR in terms of revenue, reach US\$ 2790 million by 2023, from US\$ 2240 million in 2017.
