In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global K-12 IT Infrastructure Spending market for 2018-2023.

E-learning is utilized by public K–12 schools in the United States as well as private schools. Some e-learning environments take place in a traditional classroom, others allow students to attend classes from home or other locations. There are several states that are utilizing virtual school platforms for e-learning across the country that continue to increase. Virtual school enables students to log into synchronous learning or asynchronous learning courses anywhere there is an internet connection.

North Carolina's foray into the cloud shows how K-12 institutions are realizing the benefits of remotely hosted and managed software. For example, the cloud provides an easier way for schools to perform disaster recovery and communicate with parents. A recent report found that 40 percent of schools use cloud applications to store data, and that they were experiencing 20 percent savings on IT costs as a result of moving assets to the cloud. By 2016, schools could be spending more than one-third of their IT budgets on cloud technologies.

Over the next five years, LPI(LP Information) projects that K-12 IT Infrastructure Spending will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
