In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global K-12 Makerspace Materials market for 2018-2023.

A makerspace is a collaborative work space for making, learning, exploring and sharing with a variety of maker equipment including 3D printers, laser cutters, CNC machines, soldering irons etc.

Makerspace equipment grows to reflect the interests of its members, it doesn't need to include specific equipment to be considered a makerspace. If you have cardboard, lego bricks or art supplies you're in business. It's more of the maker mind-set of creating something out of nothing and exploring your own interests that's at the core of a makerspace.

Over the next five years, LPI(LP Information) projects that K-12 Makerspace Materials will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
