## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global L-Theanine market for 2018-2023.

L-Theanine (frequently referred to as theanine) is an amino acid that is not common in the diet (not one of the essential amino acids or even one of the common nonessential amino acids).

The technical barriers of L-Theanine are not high, resulting in numerous and small manufacturing enterprises. In L-Theanine market, there are several relatively larger companies across the globe, such as Taiyo Kagaku, Blue California, ZheJiang TianRui Chemical, Qu Zhou Joy Chemical, Sichuan Tongsheng Amino acid, Hongya Yaxing Biotechnology, and FarmaSino Pharmaceuticals. And their plants mainly distribute in Japan and China. China is the largest producer, almost 70% production share in 2015. In the past few years, the price of L-Theanine has sharply decreased and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of L-Theanine.

As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. With the snatch for market share in emerging regions, the competition in L-Theanine industry will become more intense.

Over the next five years, LPI(LP Information) projects that L-Theanine will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
