In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Life Science Plastic Bottles market for 2018-2023.

Life science plastic bottles are used in life science technology, hospital, and pharmaceutical industry. Life science plastic bottles are generally made of polystyrene (PS), Polyethylene (PE), Polycarbonate (PC), Polypropylene (PP), PETG, etc. The technical barriers of life science plastic bottles are high, and the core technology of life science plastic bottles concentrates in relative large companies including Thermo Scientific, Kautex, Vitlab, Greiner Bio-One, Corning, Kartell, Bel-Art, Wheaton, Qorpak, Sarstedt, SPL Life Sciences, SciLabware, and Dynalon. These companies mainly concentrate in USA, and Europe. The United States account for about 46% of total life science plastic bottles in 2015, followed by Europe with 29.9% of production share. Life science plastic bottles have a wide range of applications in science technology institution, pharmaceutical industry and others. Because of a variety of excellent performance, life science plastic bottles are major pharmaceutical containers. The demand for life science plastic bottles is expected to continue increasing during the remaining years of the forecast period of 2016-2022. Life science plastic bottles industry will usher in a stable growth space.

In the past few years, the price of life science plastic bottles has a little change and we expect the price will slightly lower. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of life science plastic bottles.

Over the next five years, LPI(LP Information) projects that Life Science Plastic Bottles

will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
