The global production of limonene increases to 42944 MT in 2017 from 38371 MT in 2012 with average growth rate of 2.28%. Global limonene capacity utilization rate remained at around 80% in 2016.

In consumption market, the global consumption value of limonene increases with the 3.67% average growth rate. And USA and Brazil are the main consumption regions due to the bigger demand of downstream applications. In 2016, these two regions occupied 59.49% of the global consumption volume in total.

Limonene has many grades, which include pharmaceutical grade, food grade and industrial grade. And each type has application industries relatively. With pharmaceutical value and flavor effect of limonene, the downstream application industries will need more limonene products. So, limonene has a huge market potential in the future.
