## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Lithium Hydroxide Monohydrate market for 2018-2023.

Lithium hydroxide is a compound formed of the white, soft metal lithium bound to a hydroxide group with the formula LiOH. It is commercially available in anhydrous form free of chemical bonds to water, though it is a hygroscopic chemical by nature that is also sold in monohydrate form as LiOH H<sub>2</sub>O. The compound is used in a variety of industries with popular commercial demands for it in the manufacture of lithium batteries and as lithium hydroxide monohydrate to make lubricating greases.

Lithium hydroxide monohydrate is used in lubricants, consumer electronics, traffic and others. Report data showed that 57.87% of the lithium hydroxide monohydrate market demand in lubricants, 20.84% in traffic in 2015. With the development of economy, these industries will need more lithium hydroxide monohydrate. So, lithium hydroxide monohydrate has a huge market potential in the future. Manufacturers engaged in the industry are trying to produce high quality lithium hydroxide monohydrate through improving manufacturing process. It is predicted that high quality lithium hydroxide monohydrate will become the mainstream product in the future.

The major raw materials for lithium hydroxide monohydrate are Lithium ore, HCl and others. Fluctuations in the price of the upstream product will impact on the production cost of lithium hydroxide monohydrate, and then impact the price of lithium hydroxide monohydrate. Additionally, the quality of raw materials would also impact the quality of lithium hydroxide monohydrate.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents a downward trend

according to the economy development status. Also, there will be fluctuation in gross margin.

Over the next five years, LPI(LP Information) projects that Lithium Hydroxide Monohydrate will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
