The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Magnetic Couplings market for 2018-2023.

This report studies the Magnetic Couplings market. Magnetic couplings are non-contact couplings that use a magnetic field to transfer torque, force or movement from one rotating member to another. The transfer takes place through a non-magnetic containment barrier without any physical connection. The couplings are opposing pairs of discs or rotors embedded with magnets.

The leading manufactures mainly are EagleBurgmann, ABB, DST, Rexnord and Tridelta. EagleBurgmann is the largest player; its revenue of global market exceeds 3.5% in 2017.

There are mainly two type product of magnetic couplings market: disc-type coupling and synchronous coupling. Synchronous coupling accounts the largest proportion.

Geographically, the global magnetic couplings market has been segmented into USA, Europe, China, Asia (Ex China) and other. The USA held the largest share in the global magnetic couplings products market, its revenue of global market exceeds 38.5% in 201. The next is Europe and China. China being the most populous country has fast growing magnetic couplings market.

Over the next five years, LPI(LP Information) projects that Magnetic Couplings will register a 1.3% CAGR in terms of revenue, reach US\$ 1340 million by 2023, from US\$ 1240 million in 2017.
