In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Malic Acid market for 2018-2023.

Malic acid is an organic compound with the formula $C_4H_6O_5$. It is a dicarboxylic acid that is made by all living organisms, contributes to the pleasantly sour taste of fruits, and is used as a food additive. Malic acid has two stereoisomeric forms. Malic acid is in three forms in nature, i.e. D-malic acid, L-malic acid and their mixtures DL-malic acid. It's a white crystal or crystalline powder. It has strong moisture absorption, soluble in water and ethanol.

In consumption market, the global sales value increases with the 0.38% average growth rate. North America and China are the mainly consumption regions due to the bigger demand of downstream applications.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents a downward trend according to the economy development status. Also, there will be fluctuation in gross margin.

Over the next five years, LPI(LP Information) projects that Malic Acid will register a 1.3% CAGR in terms of revenue, reach US\$ 310 million by 2023, from US\$ 290 million in 2017.
