In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Marine Omega-3 market for 2018-2023. Marine Omega-3, also called ?-3 fatty acids or n-3 fatty acids, are polyunsaturated fatty acids (PUFAs) with a double bond (C=C) at the third carbon atom from the end of the carbon chain. Three types of Marine Omega-3 involved in human physiology are ?-linolenic acid (ALA) (found in plant oils), eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA) (both commonly found in marine oils). They are considered essential fatty acids and necessary for human health but the body can't make them. Also they play a role in brain health as well as normal growth and development.

Omega-3 mainly has three types involved in ALA, EPA and DHA. It is also extracted from fish oil and algae oil, etc. Omega-3 produced by algae has not been wildly used. This method has great potential.

Currently, omega-3 is mainly distributed in Europe, North America, South America and China. Europe was the largest consumption region holding 37.71% of global share, while China consumption takes only 9.05% of global omega-3 in 2017. Manufactures are limited by regional distribution of fish resources. This industry is mainly concentrated in areas which have rich aquatic resources.

In Europe, Norway is the biggest consumer country, of which the share is 25.77% of all Europe consumption. Asia-Pacific has huge market potential, especially China, the total consumption increases to 10.1 K MT in 2017 from 8.1 K MT in 2013 at a CAGR of 5.83%.

The market concentrate is rather dispersion, DSM, BASF, EPAX, Golden Omega,

TASA, Omega Protein, Croda, Marine Ingredients, GC Rieber, Polaris are main manufacturers and the total share of top 3 is 37.86% in 2017.

In the coming few years, global sales of omega-3 will continue to increase. In 2023, global sales may be 151.7 K MT. Omega-3 can be widely used in dietary supplements, fortified food and beverage, infant formula, pharmaceuticals, pet foods and other fields. With the development of economy, these industries will need more omega-3. So, omega-3 has a huge market potential in the future.

Over the next five years, LPI(LP Information) projects that Marine Omega-3 will register a 5.5% CAGR in terms of revenue, reach US\$ 14500 million by 2023, from US\$ 10500 million in 2017.
