In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Medical Transcription Services market for 2018-2023.

Medical transcription, also known as MT, is an allied health profession dealing with the process of transcribing voice-recorded medical reports that are dictated by physicians, nurses and other healthcare practitioners. Medical reports can be voice files, notes taken during a lecture, or other spoken material. These are dictated over the phone or uploaded digitally via the Internet or through smart phone apps.

Medical transcription (MT) is an allied health profession, which deals in the process of transcription, or converting voice-recorded reports as dictated by physicians or other healthcare professionals, into text format. Medical transcription services provide the groundwork for the adoption of electronic medical records (EMR) system. Medical transcription services allow hospitals and providers to outsource a critical business process, reduce costs, and improve the quality of medical documentation, without additional capital investment. The global medical transcription services market is primarily driven by adoption of medical documentation and recording systems, government's initiatives in health information infrastructure, implementation of EHRs, technological innovations through the use of electronic technology to reduce turnaround time, increasing focus on lowering costs and increasing productivity and improving the quality of patient care while ensuring patient's safety.

North America is the largest consumption place, with a consumption market share nearly 78.3% in 2017. North America currently dominates and is expected to retain its position in the medical transcription services market in the future. Growth drivers for this market in North America are factors such as rise in aging population and passing of

Patient Protection and Affordable Healthcare Act, 2013.

Over the next five years, LPI(LP Information) projects that Medical Transcription Services will register a 5.5% CAGR in terms of revenue, reach US\$ 6900 million by 2023, from US\$ 5000 million in 2017.
