The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Melamine Polyphosphate market for 2018-2023.

Melamine polyphosphate is a halogen-free flame retardant, and have very high thermal stability. It can be widely applied in thermoplastic and thermosetting plastics, rubber, fiber, and so on. MPP is especially effective for the glass fiber reinforced polyamide 66 (PA66).

First, China Melamine Polyphosphate industry concentration is relatively low; in the world wide, giant manufactures mainly distribute in Germany and Japan. In China, the manufacturers mainly distribute in Jiangsu, Shandong and Sichuan province. Sichuan Institute of Fine Chemical Industry Research and Design, Zhenjiang Sanwa Flame Retardant Technology, Jiangyin Suli Chemical, Shouguang Weidong Chemical and Novista Group are the key players in China local market. And there are hardly import products from overseas manufacturers.

Second, all manufactures in the world are committed to the improvement of product. These two years, some Chinese manufactures can almost catch up with the world's leading technology too. They are using high-end equipment and advanced technology. Third, the export percent of this industry is relatively high. China has huge production and export volume of Melamine Polyphosphate.

Over the next five years, LPI(LP Information) projects that Melamine Polyphosphate will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Melamine Polyphosphate market by product type, application, key manufacturers and key regions.
