## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Metal Tube Rotameter market for 2018-2023.

Metal Tube Rotameter is basically a variable area flow meter. The differential pressure across the annulus area is constant and the flow rate is measured as a function of the position of annulus area created by float position. The position of the float is sensed by a magnet and indicated on the dial in terms of flow rate.

Europe was the largest consumption market with a market share of 25.83% in 2012 and 25.07% in 2017 with a decrease of 0.76%. North America and China ranked the second and third markets with the market share of 20.72% and 20.83% in 2016.

The Metal Tube Rotameter market has been increased in accordance with the development of whole economy, technology and emerging application. As a whole, with the emphasis on environmental protection and people's awareness of environmental protection, new energy development is rapid, instead of part of the petrochemical industry. So, chemical, oil and gas and petrochemical industry investment will continue to slow down, but there are some food and beverage, medicine, nuclear power and municipal growth and other industries is still optimistic in the future. The Metal Tube Rotameter market competition will be more intense.

Over the next five years, LPI(LP Information) projects that Metal Tube Rotameter will register a 4.9% CAGR in terms of revenue, reach US\$ 610 million by 2023, from US\$ 460 million in 2017.
