In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Micro Bioreactors market for 2018-2023. Micro bioreactors are small bioreactors with volumes below several hundred milliliters and mini-reactors with volumes below 100 mL. Micro Bioreactors can often carry out several or even tens of parallel culture process at the same time, and therefore have certain high-flux characteristics.

Micro Bioreactor is an automated microscale bioreactor system that replicates classical laboratory-scale bioreactors. It is widely used by major Pharma and biologics companies, academic and research institutes as a reliable microscale model for a range of upstream processes.

The technical barriers of Micro Bioreactors are high. The manufacturing bases relative concentration; some of the key players dominating this market are Pall Corporation, Sartorius, Eppendorf, Merck Millipore, M2p-labs, Applikon Biotechnology and others. The Micro Bioreactors industry has got a rapid development during the last few years, with the fast development of technology and research. The global total revenue of Micro Bioreactor is 256.84 M USD in 2016. In the past four years, the global consumption of Micro Bioreactors maintained a 19.83% average growth rate. At the same time, as the development of the society and economy, more and more attention has been emphasis on importance of pharma and biotech, and more and more Micro Bioreactor has been used in big companies.

Over the next five years, LPI(LP Information) projects that Micro Bioreactors will register a 9.8% CAGR in terms of revenue, reach US\$ 500 million by 2023, from US\$ 280 million in 2017.
