In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Mineral Insulated Cable market for 2018-2023.

Mineral insulated cable is manufactured from completely inorganic material. The copper sheath and conductors, insulated with magnesium oxide ensure that the cable is able to withstand the effects of fire and is fully usable afterwards. The mineral insulated cable system provides a simple solution to many difficult wiring problems and makes for a dependable and permanent installation for virtually all types of electrical circuits.

First, as for the global mineral insulated cable industry, the industry structure is relatively dispenser. The top five manufacturers only have 36.22% revenue market share in 2015. The USA giant Raychem HTS, which has 12.42% market share in 2015, is the leader in the mineral insulated cable industry. The manufacturers following Raychem HTS are Emerson and ABB, which respectively has 9.88% and 6.12% market share globally. The TEC is the leader of China mineral insulated cable industry. It sells a total of 51.2 million dollar mineral insulated cable products in the year of 2015.

Second, the global consumption of mineral insulated cable products rises up from 175.38 Mm in 2011 to 259.91 Mm in 2015, with an average annual growth rate of 10.34%. At the same time, the revenue of world mineral insulated cable sales market has a leap from 1663.9 million dollars to 2265.7 million dollars.

The reason causes this increase is the growing demand for the mineral insulated cable products, which is the result of the growing needs of downstream industry.

Over the next five years, LPI(LP Information) projects that Mineral Insulated Cable will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx

million in 2017.
